

INSTALLATION

Sunday, August 14, 2022 10:11 AM

STEPS:

1)INSTALL COMPOSER: Install composer from www.getcomposer.org in your php path.

2)INSTALL LARAVEL: by typing the following command in your command prompt window:

- composer global require "laravel/installer".
- composer create-project laravel/laravel Project_name
(this command will install Laravel and other dependencies with it also generate the ANSI key).

CHECK: TYPE LARAVEL AND YOU SHOULD GET THIS RESULT:

```
PS C:\Users\Admin\first_app> laravel
Laravel Installer 4.2.15

Usage:
  command [options] [arguments]

Options:
  -h, --help            Display help for the given command. When no command is given display help for the list command
  -q, --quiet            Do not output any message
  -V, --version          Display this application version
  --ansi|--no-ansi      Force (or disable --no-ansi) ANSI output
  -n, --no-interaction   Do not ask any interactive question
  -v|vv|vvv, --verbose  Increase the verbosity of messages: 1 for normal output, 2 for more verbose output and 3 for debug

Available commands:
  completion  Dump the shell completion script
  help        Display help for a command
  list        List commands
  new         Create a new Laravel application
```

3)Start development server: **PHP artisan serve**: this command starts your development server.

```
PS C:\Users\Admin\first_app> php artisan serve

[INFO] Server running on [http://127.0.0.1:8000].

Press Ctrl+C to stop the server
